

Recommendations to authors of submissions selected for inclusion in ICC2009

1.- For Papers (both Refereed and Non-Refereed) and Posters:

The submissions should be original and previously unpublished. Both the Reviewers assigned by the International Cartographic Association (ICA) and the Scientific Sub-Committee (SCC, which is part of LOC in Chile) are constantly checking the submissions recorded in the system to check that this condition is complied with. If any irregularity is detected in this aspect, the submission may be withdrawn from the Conference.

2.- For Papers (both Refereed and Non-Refereed):

The mechanism for uploading your slide presentation (to accompany your oral presentation in Technical Sessions) has just been enabled in the Submissions System interface. The valid formats for this file are: .PPT, .DOC, .PDF or a ZIP compressed file. The maximum file size is 10 megabytes.

If your slides involve the use of more than one file, compress them all into just one ZIP file and upload that file to the system.

"*The size of the file (or the total of a group of files) to upload should not exceed 10MB. If you wish to submit both your Full Paper and your slides and the sum of the two is over 10MB, upload these separately, one after the other. The formats allowed for the presentation slides for your work are: PDF, PPT, DOC y ZIP."*
